9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100

Multiplication Vocabulary

Key Terms to Know

Factor

A number that is multiplied by another number.

Example:

3×4 : 3 and 4 are factors

Product

The answer you get when you multiply two numbers.

Example:

$3 \times 4 = 12$ 12 is the product

Multiply

To add equal groups together quickly.

Example:

5×3 means 5 groups of 3

Array

Objects arranged in equal rows and columns.

Example:

= 2 rows $\times$ 3 cols

Equation

A math sentence showing two equal values.

Example:

$4 \times 6 = 24$

Skip Count

Counting by equal jumps on a number line.

Example:

2, 4, 6, 8, 10...

Ways to Multiply

Multiplication Strategies

Skip Counting

Count by 3s: 0, 3, 6, 9, 12

Equal Groups

3 groups of 4 = 12

Array

3 rows $\times$ 4 cols = 12

Repeated Addition

$$3 + 3 + 3 + 3 = 12$$

Four groups of 3 $\rightarrow 4 \times 3 = 12$

Number Line

4 jumps of 3 = 12
